Potassium Iodide for Kidney Patients??

Since the earthquakes and Tsunami in Japan, there have been many news stories about the possibility of radiation leaking from the damaged nuclear reactors.

Here are some facts:

- ☣ The Federal Government is constantly monitoring the levels of radioactivity in this country.
- ☣ There is absolutely no danger in this country at this time.
- ☣ There is no reason for you to consider taking any supplement that your doctor has not directly ordered for you.
- ☣ We here at Northwest Renal Network will continue to monitor the situation and will let your facility know if there is any reason to do things differently.

Thank you,
