Northwest Renal Network's Patient Advisory Committee (PAC) is a group of energetic patient volunteers who provide input into the activities of the Network and help the Network remain patient focused. The group has 53 years of combined experience with renal failure and treatment. Members serve a 2 or 3-year term. Their experiences include first hand knowledge of in-center dialysis, home dialysis and transplant. The group uses its combined experiences and perspectives to help the Network in its mission "to promote optimal dialysis and transplant care for kidney patients in Alaska, Idaho, Montana, Oregon and Washington."

The PAC also wants to make sure that kidney patients know the Network is here to provide them with information and to help resolve their care concerns. The Network will send out notices as positions on the PAC open in the future.
