

Transplant Criteria

Interpretative Guidance Tag V513

All patients must be evaluated for their suitability for transplantation using the selection criteria for the specific transplant program.

The following Kidney Transplant Criteria have been compiled by the Northwest Renal Network to assist dialysis facilities in meeting the requirements in the Conditions for Coverage and Interpretative Guidelines.

Transplant Centers located within Network 16:

- ▶ [Legacy Health Transplant Services Program](#)
- ▶ [Legacy Transplant Criteria](#) (Current as of November 2011)
Portland, Oregon

Seattle, Washington

- ▶ [Virginia Mason Med Center Transplant Program](#)
- ▶ [Virginia Mason Transplant Criteria](#) (Current as of Nov. 2011)
Seattle, Washington

Patients interested in transplant are strongly encouraged to discuss with their nephrologist, dialysis facility, and other care providers the contents of these documents. These documents are complex and often require further explanation and clarification by your medical providers. You may locate additional educational materials on transplant on our [Patient Educational Materials](#) page.

Disclaimer: Northwest Renal Network strives to provide the most current information. Transplant Centers are solely responsible for submitting updated documents and information to the Network for posting to this website. Please contact the transplant center directly to make certain the displayed criteria are the most current.
